

ExoAsia's ultimate packing list

Our ultimate packing list should be used as a **guide only** and is not intended to be a complete packing list. Any other items that you wish to pack are at your own discretion; however, you should attempt to follow our suggested luggage weight limit of under 10kg/22lb. Some items on this list may not be necessary for your particular trip. What you bring will vary according to the trip style you've chosen, the countries you're visiting and when you're travelling. We recommend you check the details of your trip when deciding what to pack.

Please carefully consider the weather and time of year that you plan to

Please see the **What to take** section of your Trip Notes, which will detail any specific requirements for your trip and the type and size of luggage that can be taken.

If you are travelling overland in a safari vehicle then there are often specific luggage dimensions that you must adhere to.

Luggage

On the vast majority of our trips you are expected to carry your own luggage, although you will not be required to walk long distances with it (max 30 minutes). Please refer to the 'What to take' section of your Trip Notes for any specific luggage requirements. Smaller bags or backpacks with wheels are convenient but we recommend your bag has carry straps. You will also need a daypack/bag to carry water and a camera etc. for daytrips.
